Forecast for Saturday 11 Mar 2023

Weather: Most of the day will be dry. Sunny in the morning but high cloud spilling northwards in the afternoon. Some light snow together with a strengthening southeasterly winds will develop across Rannoch Moor, Ben Alder and parts of the Cairngorms through the evening period.

Chance of cloud-free hill tops above 800m: Little in the way of cloud expected on the summits during daylight hours. Cloud progressively lowering to 700 metres across the south of the area through the evening.

Low cloud and visibility: Excellent visibility with great air clarity expected for much of the day, but lowering cloud and snow quickly reducing visibility after dark.

Met Office Aberdeen Meteorologist's View
Sun glare likely off fresh snowpack.

Forecast for Sunday 12 Mar 2023
Weather: Low confidence for detail. Snow in the early hours, clearing away soon after dawn across the east. Then dry for a time before further periods of rain extend from the southwest by late morning. This will preceded by snow for a time before snow becomes confined to the highest tops in the afternoon. A lot of uncertainty at the moment as to the extent of duration of rain and snow. Some of thaw of lying snow expected leading to wet conditions especially at lower elevations.

Maximum wind: Southwesterly 30 mph with gusts to 40 mph or so, and perhaps nearer 50 mph on the Cairngorm summit but much uncertainty in this

Chance of cloud-free hill tops above 800m: 30%

Low cloud and visibility: Poor in areas of cloud down to 600 to 900 metres, lowest and most extensive cloud across the south and west of the area. Visibility becoming very poor in any snow.

Temperature: **Glens:** 0 rising to 5 Celsius
At 800m: Minus 2 rising to 2 Celsius
Freezing level: 200 metres rising to 1200 to 1500 metres by afternoon, and perhaps nearer to 1800 metres in the south
